

This revolutionary installation system makes ceiling fan installation quick, safe and easy!

Step 1:

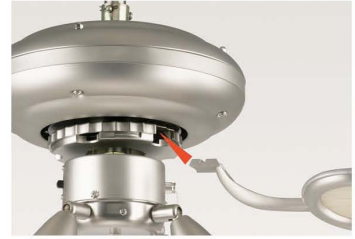

Make wire connections to mounting bracket and attach to ceiling.

Step 2:

Install the pre-assembled fan by inserting the ball hanger into the mounting bracket, raise the canopy and attach with screws.

Step 3:

Insert the pre-assembled blade and brackets into slots and lock securely.

The InstaLoc ceiling fan has approximately 15 parts and installs in minutes. A traditional ceiling fan has approximately 60 parts and can take up to two hours to install.

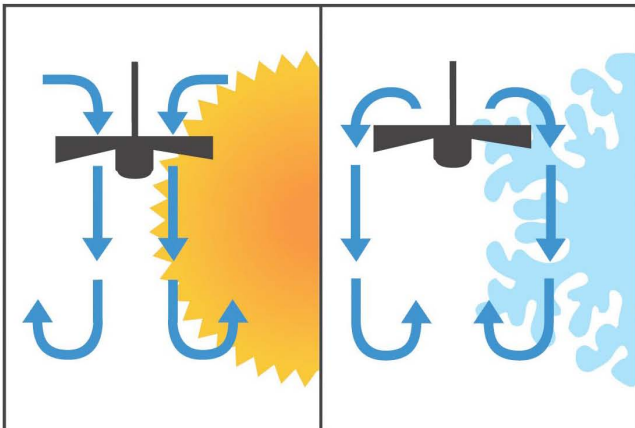

Parts of this assembly are protected by one or more of the following U.S. Patents: 6,146,191; 6,027,310; Other U.S. and European patents pending.

Traditional Ceiling Fan

Summer

Winter

Saves up to 30% energy & heating costs
